Noah.matsubara15@gmail.com

OBJECTIVE

Seeking an opportunity to be challenged, and to grow as a developer. I have a passion for web development, and aim to learn from experienced team members, create a relationship with a successful business, and contribute to the growth of the organization in any way I can.

EDUCATION —

University of Jamestown
Jamestown, ND

Bachelor of Computer
Science
2018 – May 2022

| Completed Udemey Courses:
Python,
React.js
MERN stack development

Accomplishments:
| Deans' List 2019-2022
| Athletic Scholarship
| 2022 GPA: 3.7

KEY SKILLS —

- C++
- Java
- Python
- HTML, JavaScript, CSS
- MongoDB
- Express
- React (React Router, Redux)
- Node.js

EXPERIENCE

May 2021 – August 2021

Healthcare Technician • Precede Occupational Health Services

- Primary role was to screen employees working for ENMAX Energy and ATCO Energy for Covid-19
- Communicated with over 100 employees each day
- Documented employees screening results
- Administered Covid-19 Rapid Antigen Tests

Projects

- Created Robot which could maneuver through a maze using an Arduino which was programmed to sense which direction was clear. Used 'if/then' and 'for' loops in C++ which created a protocol for the Arduino to execute before a decision was made.

- Created an Expense Tracker App using React. App allowed a user to input and delete expenses which would be displayed in an unordered list or could also be displayed as a bar chart of monthly expenses.
